Talcahuano, Chile · jsalonas2003@gmail.com

salonas.github.io · github.com/salonas · LinkedIn: Joaquín Salinas Enríquez

## EDUCATION

### Instituto Profesional Santo Tomás

Computer Engineering (*Ingeniería en Informática*)

Concepción, Chile

2024 to 2028 (expected)

## EXPERIENCE

### Procedimiento Seguro

Co-founder, *infrastructure and deployment*

Chile

2026 to present

- A web app that lets police officers put together reports and statements from their phone. Live since October 2026, as a free pilot.
- Took the app (Next.js and PostgreSQL) to production on a Linux machine in Azure, running as a systemd service.
- Published it through a Cloudflare tunnel, with no open web ports on the server.
- Set up daily encrypted database backups and a deployment that returns to the previous version by itself when something goes wrong.
- Designed the traffic report in six boards and a clickable prototype, to try the flow with users before it was coded.

## PROJECTS

### Agami's Alley

2D action survival game. *Unity 6, C#, Aseprite, FL Studio*

2026

- Programmed the mechanics, drew and animated the pixel art, and composed the music and sound effects. The demo plays in the browser.

### salonas.github.io

Personal portfolio. *React 19, Vite, Vitest, GitHub Actions*

2026

- Bilingual site with more than 200 automated tests and automatic publishing on every change.

### OrquestaDeCobquecuraWEB

Management system for a youth orchestra. *React, Node.js, Express, MySQL*

2025

- Fullstack development of the management of students, teachers, instruments, events and news. On hiatus.

### Plantochi

Virtual pet that looks after a real plant. *ESP8266, MQTT, Node-RED, React*

2025

- Team project. Designed the IoT system and drew the sprites for the web app.

### Guide

Android assistant. *Java, Firebase, Gemini API*

2025

- Game guide with chat between users, sign-in and a chatbot.

## ACADEMIC CERTIFICATIONS

### Instituto Profesional Santo Tomás

Concepción, Chile

- Advanced Programming, 270 hours (2026).
- Basic Programming, 288 hours (2025).
- Basic Software Design, 162 hours (2025).
- IT Support, 144 hours (2025).

## SKILLS

**Languages:** C#, Java, JavaScript, Python, SQL.
